

FARHAN NADIM

Full Stack Developer | B.Sc. Computer Science & Engineering

Narayanganj, Dhaka, Bangladesh | Phone: +880 1403-527730 | Email: farhannadim2023@gmail.com

GitHub: github.com/Farhan0140 | LinkedIn: [linkedin.com/in/farhan-nadim](https://www.linkedin.com/in/farhan-nadim) | Portfolio: portfolio-ten-xi-f5y73tieib.vercel.app

PROFESSIONAL SUMMARY

Computer Science and Engineering student with hands-on experience in full-stack development using Python, Go, Django REST Framework, React, React Native, and PostgreSQL. Built and deployed four full-stack projects and solved 600+ coding problems on Codeforces, LeetCode, and CodeChef. Also experienced in ESP32/Arduino-based IoT projects. Seeking a Software Engineering internship to grow my skills and contribute to real-world projects.

TECHNICAL SKILLS

Programming Languages: Python, Go, JavaScript, SQL

Backend Development: Django, Django REST Framework, REST API Design & Integration

Frontend Development: React, React Native, HTML5, CSS3, JavaScript (ES6+)

Databases: PostgreSQL, SQL, Neon, Supabase

Tools & Platforms: Git, GitHub, VS Code, Vercel, Render, Netlify

Embedded Systems / IoT: ESP32, Arduino Uno, Sensors, Microcontrollers, Embedded Logic

Core Competencies: API Integration, Database Design, Data Structures & Algorithms, Problem Solving

FULL-STACK & SOFTWARE PROJECTS

PropNest — Real Estate Listing & Management Platform | *Go, React*

- Built a property listing and management platform enabling users to browse, list, and manage real estate properties.
- Developed the backend in Go and the frontend in React, connecting both end-to-end through custom REST APIs.

GitHub: <https://github.com/Farhan0140/PropNest>

Soul Shield — Habit & Routine Tracking Application | *Go, React, React Native*

- Built a habit-tracking application that helps users build and maintain daily routines, including prayers, reading, and other recurring habits.
- Implemented streak tracking, custom reward messaging, and reminder notifications on a single Go backend serving both a React web client and a React Native mobile client.

GitHub: https://github.com/Farhan0140/Soul_Shield

CarbonLens — Personal Carbon Footprint Tracker | *Django REST Framework, React, PostgreSQL*

- Developed a full-stack application that tracks users' daily carbon emissions and visualizes their environmental impact.
- Designed and implemented RESTful APIs using Django REST Framework to support core application functionality.
- Integrated PostgreSQL for persistent data storage and connected the backend to a React frontend.

GitHub: <https://github.com/Farhan0140/CarbonLens>

StockFlow — Shop Management & Profit Tracking System | *Django REST Framework, React Native, PostgreSQL*

- Developed a shop management and profit-tracking system to help small businesses manage operations and financial records.
- Built backend functionality and REST APIs using Django REST Framework, backed by a PostgreSQL database and a React Native client.

GitHub: <https://github.com/Farhan0140/StockFlow>

IOT & EMBEDDED SYSTEMS PROJECTS

SmartStep — Footstep Energy Harvesting & Automatic Street Lighting | *ESP32, Piezoelectric Sensor, Voltage Sensor, I2C LCD, LDR, Relay*

- Built a renewable-energy system that converts kinetic energy from human footsteps into electricity to automatically power street lighting.

SmartBaby — IoT-Based Baby Monitoring & Safety System | *ESP32 Dev Module, ESP32-C3 Mini, Relay Module, Temperature & Gas Sensors*

- Built an IoT system that continuously monitors a baby's environment and provides automated protection with real-time alerts to caregivers.

Smartshield Himaghar — Cold Storage Monitoring & Safety System | *Arduino Uno, LCD Display, Temperature & Gas Sensors, PIR Motion Sensor, SIM800L GSM Module, Relay*

- Built a smart monitoring and safety system for cold storage and refrigerated warehouses, tracking temperature, gas levels, motion, and door status to protect stored goods.

SmartDesk — IoT-Based Smart Table Management System | *ESP32, Ultrasonic Sensor, OLED Display, Temperature Sensor, LDR Module*

- Built a smart desk system that automatically monitors and controls connected devices, such as a laptop, cooling fan, and table lamp, based on real-time sensor data.

EDUCATION

B.Sc. in Computer Science & Engineering | *University of Information Technology and Sciences (UITS)*

Expected Graduation: 2027 | CGPA: 3.42 / 4.00

Higher Secondary Certificate (HSC) | *Govt. Tolaram College*

GPA: 4.75 / 5.00

Secondary School Certificate (SSC) | *Rofiqul Islam School and College*

GPA: 4.78 / 5.00

PROBLEM SOLVING & COMPETITIVE PROGRAMMING

600+ problems solved across Codeforces, LeetCode, and CodeChef, reflecting strong fundamentals in algorithms and data structures.

Codeforces: _Farhan_Nadim

LeetCode: APtfcgMQdE

CodeChef: farhan_nadim (2★)

ADDITIONAL INFORMATION

Languages: English (Basic), Bengali (Native)

Availability: Full-Time

Career Interest: Software Engineering (Full-Stack Development)
